

saunum

A sauna heater for public boutique saunas

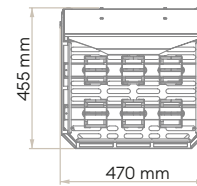

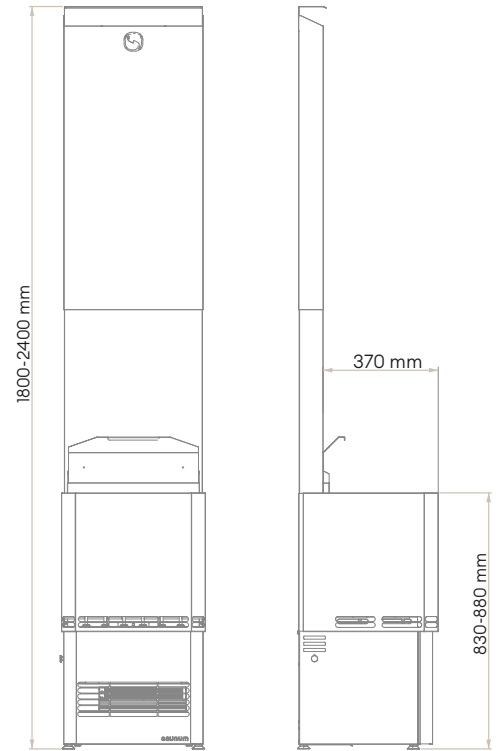

saunum pro experience

Saunum Pro Experience unique heater with a sauna climate regulating system is ideal for creating an extraordinary sauna session in a more intensively used sauna. The large stone volume of Saunum Pro Experience and the patented air-blending system ensure exceptional steam that is soft and long, and evenly distributed throughout the sauna. The innovative steam mixed with cooler air allows you to breathe easier and enjoy the sauna without feeling fatigue and headaches. Using different heater settings, you can create a 5-in-1 spa solution, which allows you to transform a classic Nordic sauna into a sauna enriched with salt ions, a mild relaxation sauna, a humid-steam rich sauna, and a relaxing aroma sauna.

A sauna heater for public boutique saunas

Saunum pro experience

Power of the heater	9 kW / 12 kW / 15 kW
Sauna room	8–11m ³ / 10–14 m ³ / 14–22m ³
Min 9/12/15 kW Max height of the room	1900/2000/2100 2400 mm
Min safety distance from the heater:	
Sides:	50 mm
Front:	50 mm
from stones to ceiling	9 kW – 1050 mm 12 kW – 1150 mm 15 kW – 1250 mm
Included:	heater, climate device, salt balls 7 pcs
Stone basket	closed
Colour	black
Climate regulating system	3 speed levels, vent adjustment
Height of the device	Adjustable, 1800–2400 mm
Depth and width of the device	455 x 470 mm
Weight	48.5 kg

Five-in-one home spa

Traditional steam

Long mild steam

Easy to breathe

Suitable for the whole family

Additionally required:

Heater stones Ø 10–15 cm	105–120 kg
Fuse, 3 phases	9 kW – C16 / 12 kW – C20 / 15 kW – C25
Power cable, 3 phases	From the electrical panel 5 x 4 mm ² , from the control unit 5 x 4 mm ² , (15 kW control unit is included with contactor)
Power cable for the climate system	With Saunum Leil control unit 5 x 1,5 mm ²
Control unit	Saunum Leil or Saunum Leil Mobile
For the aroma sauna	Saunum Sauna Oil Set
For steam diverting	Saunum Experience Steam Deflector

How do Saunum's heater work?

Saunum's patented air-blending system traps the scorching steam, that rises under the ceiling of the sauna room, mixes it with cooler air on the floor surface, and directs the soft steam back evenly. This ensures a more even temperature of the steam, and the oxygen-enriched steam makes it easier to breathe. Water can be thrown more often to produce more steam, making the sauna air more humid, and ensuring more intense sweat.

With Saunum's patented method of enriching the air with salt ions, the salt ions from the natural salt spheres added to the sauna climate device are infused into the circulating air to reach the skin and respiratory tract.

An even more relaxing sauna experience is created with the help of the aroma system, which mixes sauna oil aromas with the steam. It is a healthy alternative to burning aromatic oil on hot stones.

Choose the heater with power adequate to the cubage of the sauna room

However, for non-insulated walls (brick, glass block, glass, concrete, floor tiles, etc.) a more powerful heater is needed. Add 1.2 m³ to the cubage of the steam room per each square meter of uninsulated wall. For example, a 10 m³ sauna room with a glass door corresponds to the power requirement of a 12 m³ sauna room.

Smart sauna control unit Saunum Leil

Saunum Leil is a next generation sauna controller that is convenient and easy to use. According to sauna data, Leil optimizes the time spent on heating and thereby also energy consumption. Three pre-settable sauna modes let you heat the sauna with just a few taps on the screen. With the help of **Saunum Leil Mobile**, you can control your sauna wherever you are at the moment. Sauna notifications are displayed on the user's mobile phone screen.

Sensational experience relaxing 5-in-one spa solution

Try different settings and steam intensities and add your favourites to the selection of steam types on the control unit.

Classic Nordic sauna

Temperature 60 – 100 °C

The climate regulating system:
speed level 1, the valve 25% open.

Humid steam-rich sauna

Temperature 45 – 60 °C

The climate regulating system:
speed level 2 or 3, the valve 100% open.
The lower the temperature, the more open the
valve and the higher the speed of the climate
regulating system, the more steam is generated
when throwing water on a heater.

The mild, relaxing sauna

Temperature 40 – 55 °C

The climate regulating system: speed level 1, the
valve at least 25% open, if you prefer a softer,
more humid sauna.

Sauna enriched with salt ions

Temperature 40 – 100 °C

The climate regulating system: speed level 1, the
valve 25% open. The salt spheres added to the
climate device work at any temperature, if the
sauna climate system is switched on.

Aroma sauna

Temperature 40 – 90 °C

The climate regulating system: speed level 1, the
valve 25% open. Replace one of the salt spheres
with an aroma bowl, add some Saunum aroma
oil into it and enjoy!
